Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- A Drought Proclamation Continuance from Plumas County received on 11/09/15.

Weather of Concern

- Hard Freeze Watch in effect from late tonight through Wednesday morning, and from late Wednesday night through Thursday morning for areas in Los Angeles County.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Cool, dry conditions can be expected this afternoon with cold overnight temperatures across interior valleys again tonight. Frost will be likely with freezing temperatures possible in some areas. Light rain is expected north of Cape Mendocino Wednesday with widespread rain possible over the weekend.

Medford Weather:

Areas of morning frost and fog will give way to partly cloudy skies as a small scale ridge builds overhead. This will result in a dry forecast throughout the day, but precipitation will return late tonight into Wednesday. Showers will linger into Wednesday night, but all precipitation should come to an end by Thursday morning. On Thursday and Friday, high pressure will try to edge into southern Oregon and northern California. While the bulk of the area stays dry, a few showers are likely to move onshore along the coast north of Cape Blanco, or skirt through northern Douglas County and into the Cascades north of Crater Lake.

Reno Weather:

A cold winter storm will slowly exit western Nevada today. Moderate snow will continue this morning across west central Nevada before ending by this afternoon. High pressure is then expected for the rest of the week with a slow warming trend. Valleys will struggle to warm with strong inversions, especially in areas that have snow cover such as along the Sierra front. Another Pacific storm is possible early next week.

San Francisco Weather:

Look for a few showers to linger through the morning hours especially in Monterey and San Benito Counties. Otherwise today will be a dry and cool day. A couple of very cool nights are forecast for tonight and Wednesday night which will lead to patchy frost, especially Wednesday morning.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Precipitation will taper off across the region today as the winter storm shifts to the east. Dry weather is expected for the remainder of the week.

Hanford Weather:

A few showers may linger over the mountain areas today as the storm exits the Great Basin. Expect dry conditions while temperatures will continue at below average levels for the rest of this week. Patchy night and morning fog is possible in the San Joaquin Valley.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Isolated showers across northern and mountain areas will end today as an upper low over the state moves east. It will be windy in some areas and temperatures will be below normal. High pressure and offshore flow will bring clear skies and a warming trend to the region Wednesday through Friday, although it will be quite cold each night across the interior. Daytime highs will remain above normal Saturday. An upper low moving into the west coast will bring cooling Sunday and Monday, with a slight chance of rain to northern areas.

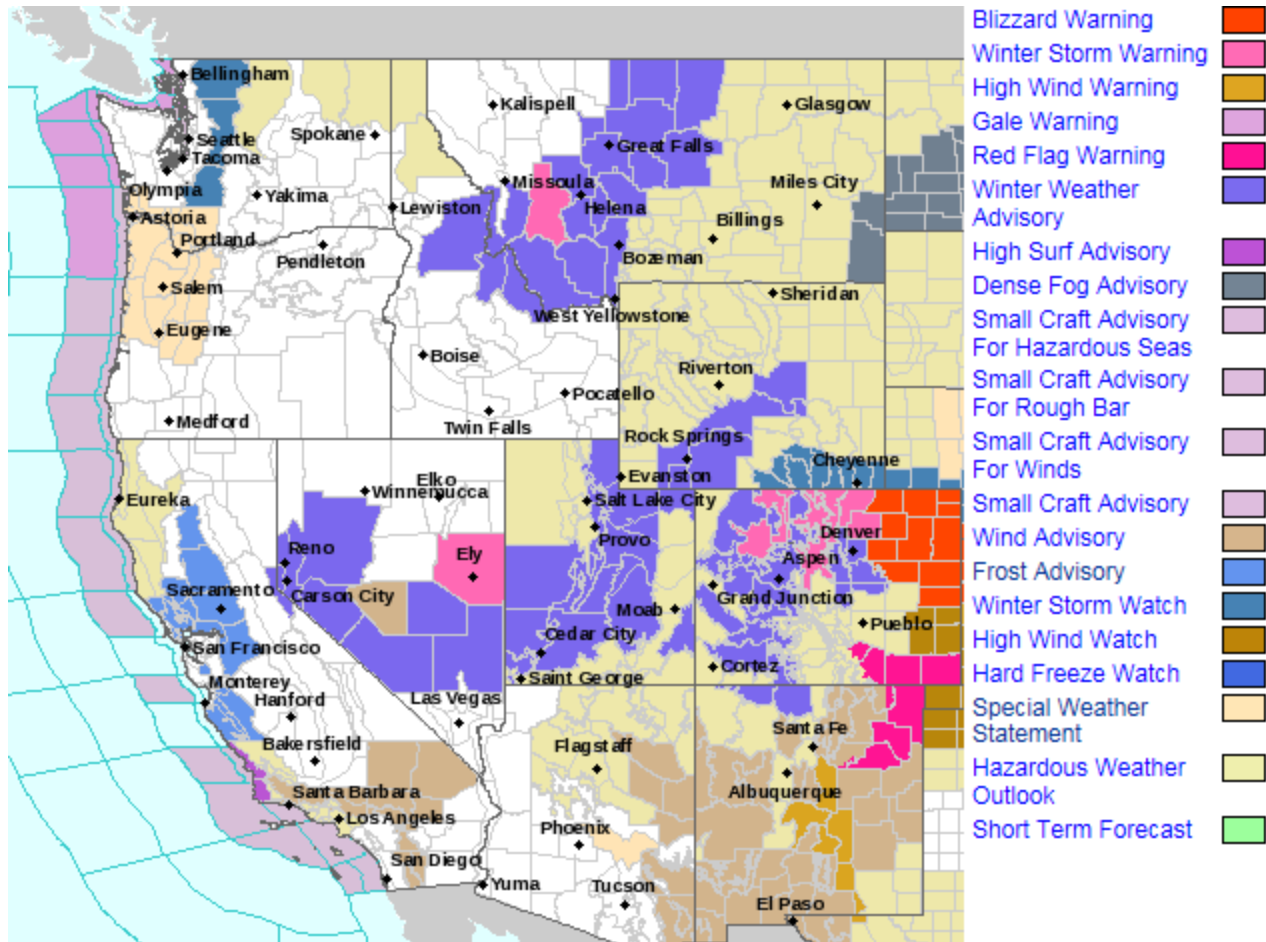

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A low pressure system will move inland today with showers ending from the northwest during the morning and with gusty west winds continuing for the mountains and deserts into the afternoon. Dry and warmer conditions for Wednesday through Saturday with periods of gusty northeast winds near the coastal foothills. Cooler temperatures with a return of onshore flow are forecast for Sunday and Monday as a trough of low pressure moves inland through California.

Southeast California Weather:

A period of cooler weather starts today as a low pressure system sweeps through the Four Corners area. High temperatures today and Wednesday will struggle to reach 70 degrees across the lower deserts. A gradual warming trend will begin on Thursday with temperatures reaching near seasonal normal and lasting into early next week.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought
